LANDLORDLEDGER · WINTER READY · EP. 1 · FREE CHECKLIST

WINTER PIPE CHECKLIST

Do this before the first hard freeze.

OUTSIDE FAUCETS

- [ ] Unhook every garden hose (even on frost-free faucets)
- [ ] Shut the indoor shutoff valve for each outside faucet
- [ ] Open the outside faucet so leftover water drains, then add a foam cover

INSIDE

- [ ] Know where the main water shutoff is; tag it
- [ ] Insulate pipes in garage, crawl space, attic and outside walls
- [ ] On very cold nights, open sink cabinets on outside walls

LANDLORDS

- [ ] Add this to the fall checklist for every unit
- [ ] Show tenants the main shutoff and who to call
- [ ] Ask tenants to keep heat on when away

IF A PIPE BURSTS

- [ ] Shut the main water valve
- [ ] Call a licensed plumber; take photos for insurance
- [ ] **BONUS: the pipe that freezes first: revealed in Winter Ready · Ep. 2**
